

Christopher Omahen

Frontend Developer

Rochester, NY | me@chrisomahen.com | (607) 287-2194 | chrisomahen.com | linkedin.com/in/chris-omahen

SUMMARY

Frontend developer with 3+ years contributing to the greenfield development of a B2B SaaS platform's flagship product rebuild, on a small, three-person engineering team. Built out core data tools in React and TypeScript, including a re-architecture of data handling that scaled from hundreds to nearly 10,000 records per client while cutting query times from several seconds to roughly half a second. Comfortable owning individual features end-to-end, from API integration through automated testing.

SKILLS

Languages: TypeScript, JavaScript (ES6+), PHP, SQL, HTML5, CSS3, C#

Frameworks & Libraries: React, Next.js, Mantine 7.x, ChakraUI 2.x (Migration), TanStack Query/Table, React Hook Form, Axios, Laravel

Testing: Vitest (unit), Playwright (end-to-end)

Tooling & DevOps: Node.js, Composer, Vite, ESLint, Prettier, Git, Bitbucket, Jira

AI-Assisted Development: Claude (Code/Chat), Gemini, Amazon Q

EXPERIENCE

Frontend Developer | DonorSearch by EverTrue

March 2023 – June 2026 | Remote

- Contributed to the greenfield development of a modern web application within a lean, 3-developer team to fully replace DonorSearch's legacy flagship product.
- Developed complex data tables spanning up to 60 columns and scaling to nearly 10,000 records for the largest clients; re-architected filtering from a client-side to a backend-driven approach, cutting query load times from several seconds down to roughly half a second.
- Implemented data-driven forms and validation workflows using React Hook Form, streamlining user input handling across the application.
- Participated in migrating the UI framework from ChakraUI 2.x to Mantine 7.x mid-development, adapting components to the new library and resolving breaking changes.
- Integrated RESTful APIs using Axios and TanStack Query, collaborating closely with backend engineers on live, rapidly evolving endpoints.
- Implemented automated testing with Vitest for unit tests and Playwright for end-to-end flows, catching regressions before they reached production during rapid development phases.
- Took the initiative to refactor global UI components to match new corporate design standards following EverTrue's acquisition of DonorSearch.
- Contributed occasional minor codebase edits to the Laravel backend when necessary to unblock frontend development tasks and expedite feature delivery.
- Adopted Claude Code to accelerate planning, debugging, and testing workflows, after evaluating and pivoting away from Amazon Q.

Sales Development Representative | REVGEN NC

June 2022 – November 2022 | Remote

- Collaborated with Account Executives to manage sales pipeline, conducting 100–120 B2B prospecting calls daily.

Tech Consultant | Target Corporation

October 2019 – June 2022 | On-site

- Resolved technical issues for customers and managed high-volume electronics inventory, floor presentation, and displays.

EDUCATION

Rochester Institute of Technology | Rochester, NY

Bachelor of Science in Applied Arts and Sciences

- Tracks: New Media Interactive Development, Digital Humanities, and English
- Focuses: UX Design, OOP, Web Design, Creative Writing, Digital Ethics
